

# HELIX DUO 1300<sub>S2</sub>

Spreaders

Discover the innovative JF HELIX DUO 1300 S2, the solution you've been looking for to cover your land with productivity! With its new modern and sturdy design, it is the ideal equipment to help you save and achieve precision in the distribution of fertilizers and seeds.

With exceptional performance and unparalleled precision, its system allows the fertilizer or seed to reach the throwing disc without suffering any bumps and is thrown smoothly and precisely, avoiding fragmentation.

In addition, it has a hydraulic system from the tractor to control the opening and closing (independently or simultaneously) of the right and left gates, guaranteeing precise application. With proper calibration, the application will be uniform and precise up to a working width of 24 m.

## BENEFITS

- ✓ The Helix Duo precision system with a central chamber technology allows for a smooth, bump-free launch with less dust and minimal wind influence, saving fertilizers and seeds;
- ✓ The discs, vanes, gates, and bottom closure are made of stainless steel;
- ✓ The adjustable vanes have a simple adjustment pin, and no tools are required;
- ✓ The polyethylene hooper is resistant to oxidation and UV protection, with easy maintenance and cleaning;
- ✓ Work can be done on the edges, where the fertilizer can be spread on one side only.

The Helix Duo precision system with a central chamber allows for smoother flow, leading to distribution with less dust and saving fertilizers/seeds.

Eccentric agitator for better distribution flow.

\* CALIBRATION KIT INCLUDED

## TECHNICAL SPECIFICATIONS

Working Width	Required Power	Required Rotation	Loading Capacity	Weight	Length	Width	Height
9 to 24 m	From 30 to 50 hp	540 RPM	1300 liters	302 Kg	2,2 m	1,52 m	1,52 m
