

MAESTRO 600

Pendulum Spreader

Cover your land with productivity.

FACTORY ITAPIRA, SP

FROM BRAZIL TO ALL CONTINENTS OVER 50 COUNTRIES

FACTORY SÃO JOÃO DA BOA VISTA, SP

**Spreaders line
JF, the solution for the farmer!**

SPREADERS LINE

JF Maestro 600 is a pendulum spreader specially designed for the uniform distribution of granular fertilizers and seeds. It's also possible to be used on dry limestone broadcast.

One of the highlights is the possibility of using it to accurately distributing fertilizers in orchards and forestry plots, spreading the material directly into the plant, avoiding waste.

JF Maestro 600 shaking and pendulum system has an oscillating motion which allows the continuous material flow into the pendulum, preserving the fertilizer shape and avoiding damage to the seeds. JF Maestro 600 also has an extra shaker for different products which makes it much more versatile.

| TECHNICAL FEATURES | JF Maestro 600 |
|----------------------------|-------------------|
| Power source | tractor PTO |
| Height | 1330mm |
| Load capacity | 600lt |
| Lenght | 1700mm |
| Width | 1500mm |
| Working width | 9 to 14 meters |
| Required power at PTO | 50 cv |
| Required revolution at PTO | 540 RPM |
| Capacity ¹ | 50 to 2.000 kg/ha |
| Weight | 139 kg |

¹The productivities are average evaluations obtained during test conditions and may vary according to the product humidity degree, specific weight, equipment adjustment and working conditions.

Advantages

- Independent pendulum unit with easy maintenance and calibration which maintains performance even on sloping fields
- Hopper with 600 liters capacity is built in virgin polyethylene free of oxidation and easy maintenance and cleaning of distribution mechanism
- Pendulum and distribution cone which are in contact with fertilizers are made of nylon fiber for avoiding oxidation
- Shaker system with oscillating motion and extra shaker device for diferente products
- Adjustable material releasing avoids lacking or remaining of material at the end of operation.

Shaker with oscillating motion

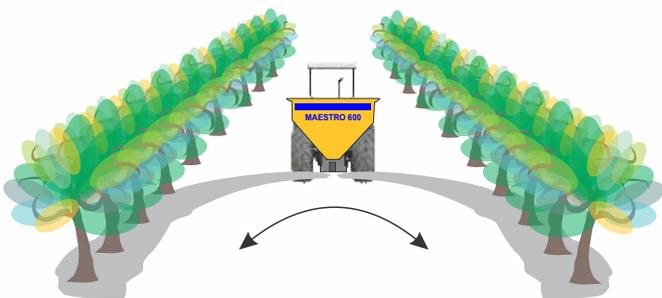

Pendulum

Adjustable material broadcast

Technical description: Pendulum spreader for fertilizer and seed with 600 liters capacity, powered by tractor PTO, frame built in steel, hopper made of polyethylene, featuring an independent pendulum unit, pendulum made in nylon fiber, distribution range from 9 to 14 meters, shakers with oscillating motion system, shaker with cone built in nylon fiber, extra shaker for different products, adjustable dosage by material releasing control, driven by PTO shaft, dosing bar, dosage bar lever, 50 hp required power at PTO, required revolution at PTO of 540 RPM.
