

JF 100

Hammer Mill

STRONG AND ROBUST, DRY OR MOIST.

The JF 100 Mill processes crops in both dry and wet conditions. It turns maize into cracked grain or flour, grinds cereal straw and seeds, and offers the ideal features for high-moisture grain silage production. Powered by the tractor's PTO, it delivers high performance for animal feed production.

FEATURES

- ✓ Heavy-duty construction
- ✓ Highest performance
- ✓ Simple operation and low maintenance cost
- ✓ Lateral discharge to work with the cutting floor
- ✓ Can be used to crush green coconut and vegetable waste

Sieves of 5, 8, 10 and 14 mm included

Side and bottom discharge chutes

Driven by the tractor PTO

TECHNICAL SPECS

Production	up to 15 ton/h ¹	Number of hammers	60
Required tractor power	from 80 to 130 hp	Approximate weight	544 kg
Required rotation power	540 RPM	Coupling	cat II
Drive	Tractor PTO	Discharge chute	side and lower
Sieves	5, 8, 10 and 14 mm 3 and 18 mm (optional)		

¹Productivity may vary and depends on the following factors: chop size; forage yield per hectare; tractor power; logistical capacity (wagons) for forage transportation, among others.
